((cd

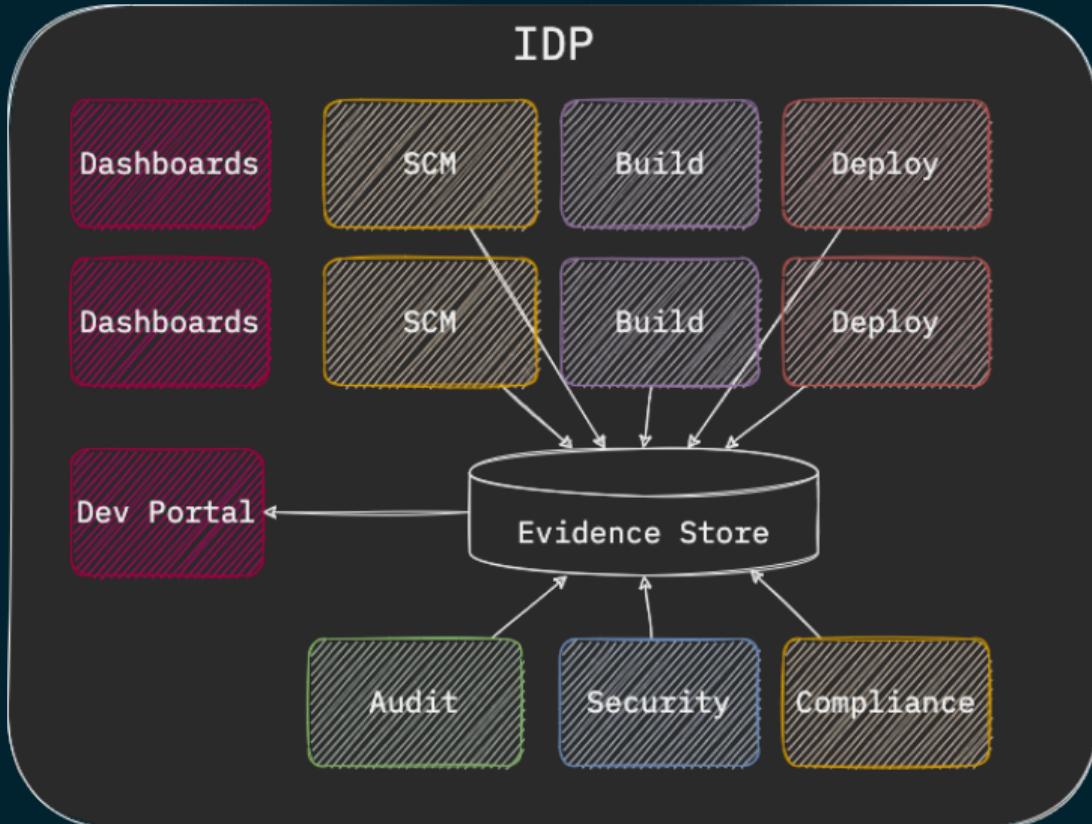

Software Factory

- › "Glue code" explosion
- › Does not scale
- › Expensive to onboard new services
- › Hard to maintain

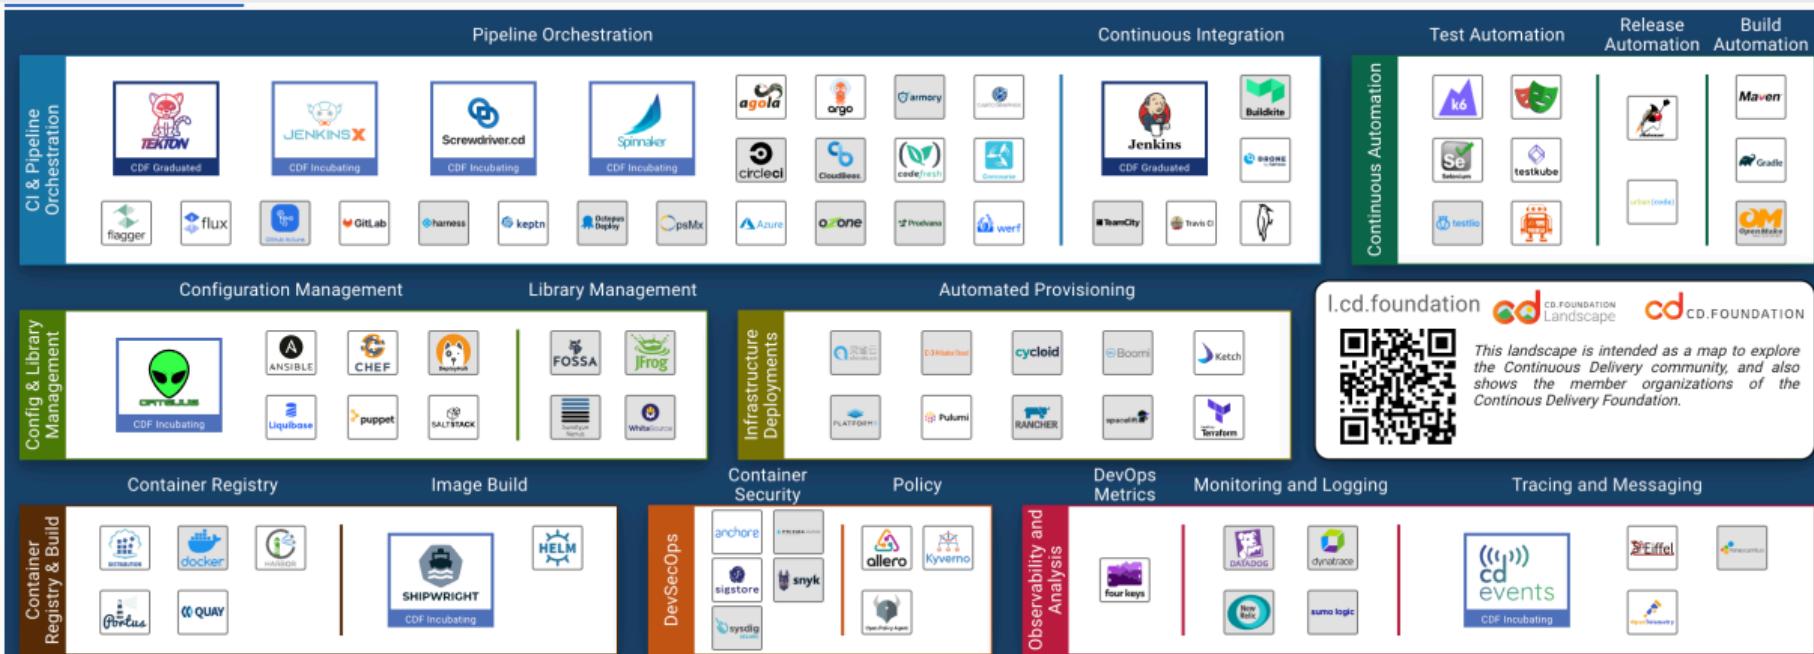

Internal Development Platform

- › Lock-in effect
- › Missing/Broken Data
- › Many Dashboards

A Plethora of Tools

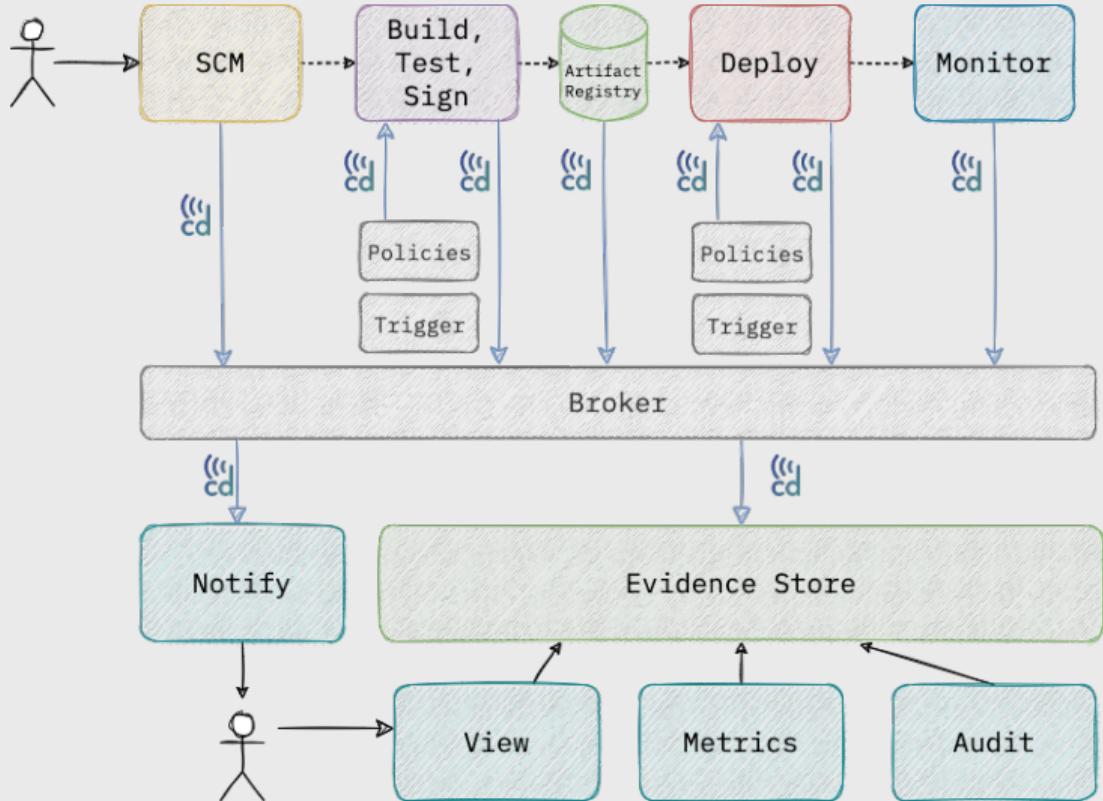

A common specification for Continuous Delivery Events

Interoperability

- › Less "Glue Code"
- › More focus on DevEx and DevOps metrics
- › Better quality data
- › Drive Best Practices

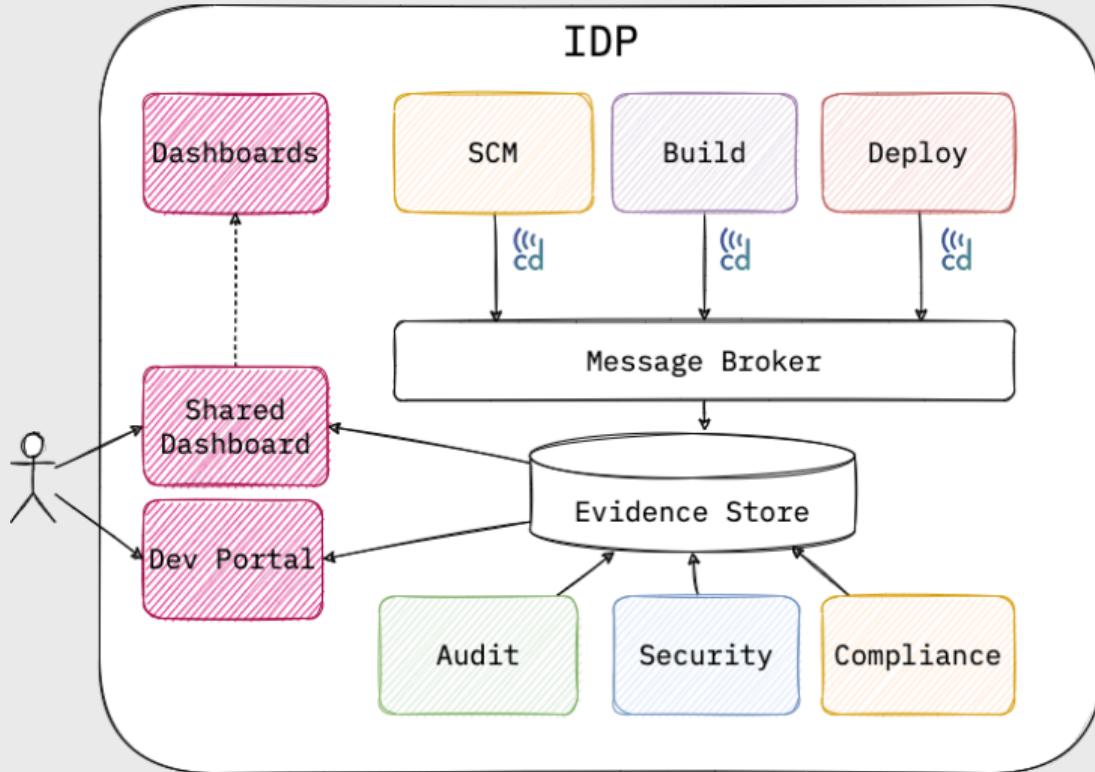

Evidence Store Supply Chain Security

- › Where is this code deployed?
Tracking vulnerabilities
- › How was this code built?
Audit and compliance
- › How long did it take?
DevOps Metrics
- › What's happening right now?
One overview dashboard for all needs

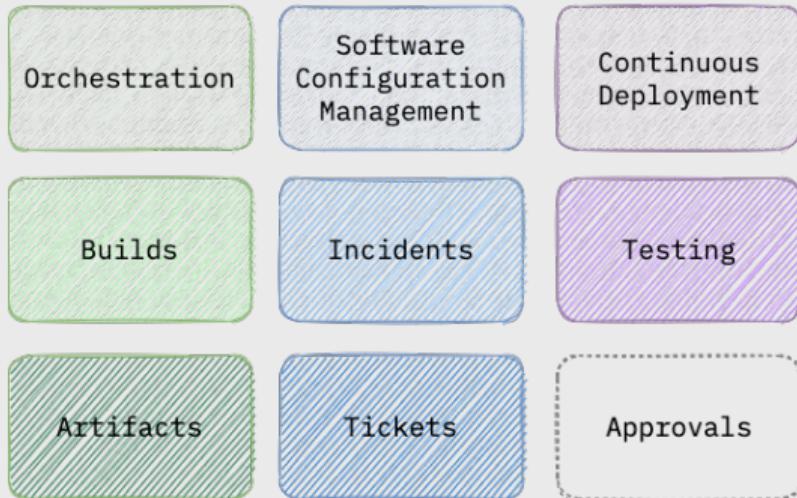

IDP and CDEvents

- › Add/swap tools
- › Consistent Data
- › Single Dashboard
- › Promotes Collaboration through Open Source
- › CDEvents and [CNOE.io](#)

Components

Specification:

Bindings:

SDKs:

Community

- DevOps Engineers
Share your Interoperability pain-points
- Tool Maintainer
Adopt CDEvents for your tool
- DevOps Vendor
Make it easier for users to integrate
your offering by supporting CDEvents
- Love DevOps & Interoperability
Join us and contribute to CDEvents!

What's New

Photo by [Josh Sorenson](#), CCO

((c)) cdevents 0.4

Linked Events:

- › Connect Events
- › Fast Filtering
- › Visualization
- › Audit Trail

Ticket Events:

- › Inception to Deployment
- › E2E Metrics
- › Ticket Based Automation
- › Interop.

Custom Events:

- › Schema
- › Custom Types

Artifact Events:

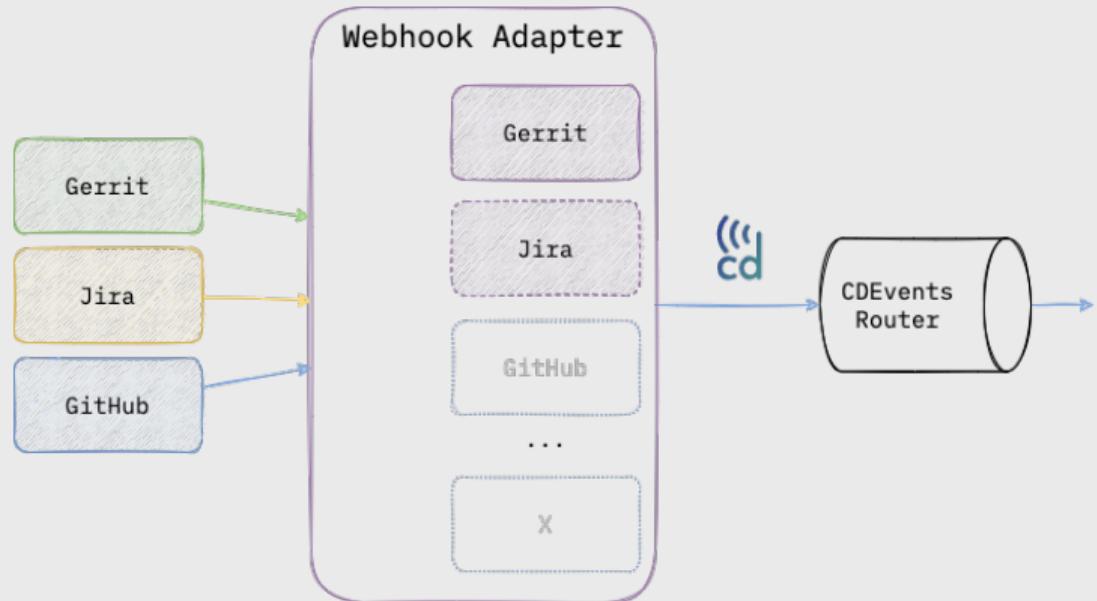

- › SBOM, User
- › New Predicates

Release Announcement:

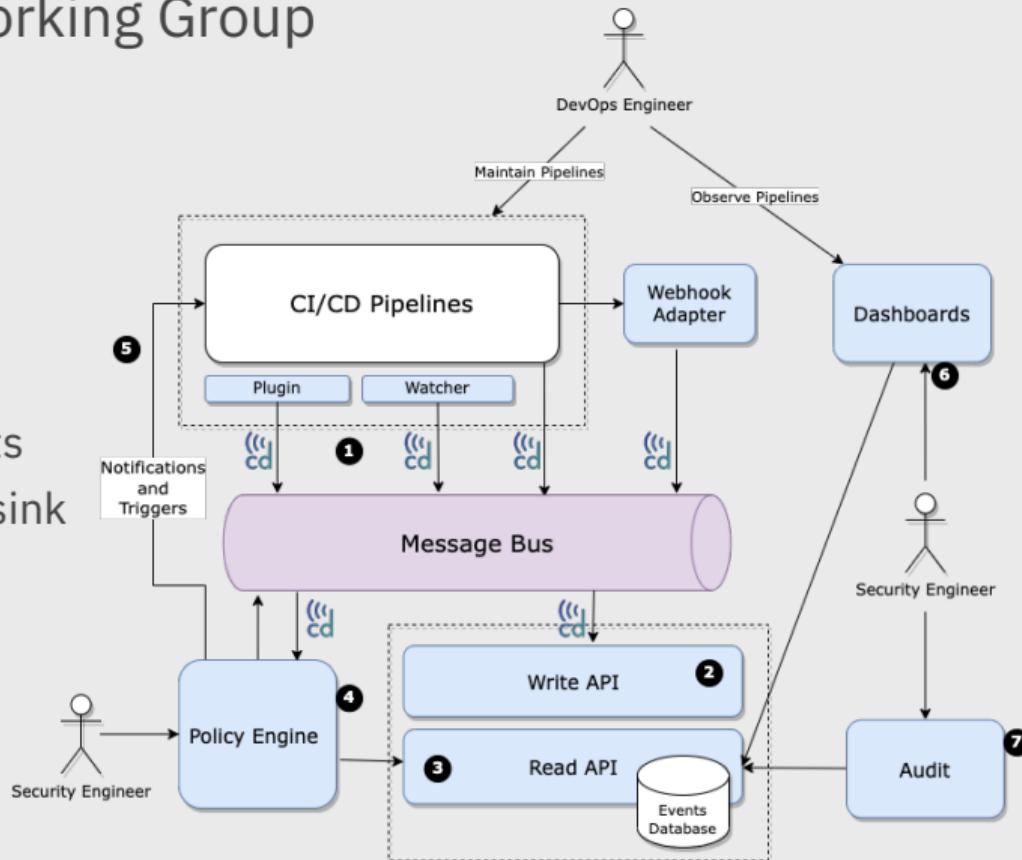

Webhook Adapter

- › Plugin mechanism
- › Translate into CDEvents
- › Deliver CDEvents to a sink

Implementation Working Group

- › Send Events
- › Translate into CDEvents
- › Deliver CDEvents to a sink

Roadmap

CDEvents Roadmap

v0.5 and beyond

New features

- Approvals
- Compositions
- Releases

Software & Architecture

- SDKs (JS, .NET)
- Webhook Adapter
- Visualization
- Links Service

Proof of Concept

- CDEvents + CNOE.io
- CDEvents Visualization

Continue to Drive Adoption

Conclusions

- › Lack of Standardization in the Continuous Delivery Space

which means

- › Complexity & Costly integrations
- › Risk of inconsistent and incomplete data
- › Developer fatigue

- › CDEvents is a common specification for Continuous Delivery Events

which means

- › Standardization
- › Flexibility & Better DevEx
- › Better supply chain security stance through data

Thank You!
