Software Factory

CDEvents

What's New

Roadmap

Thank You

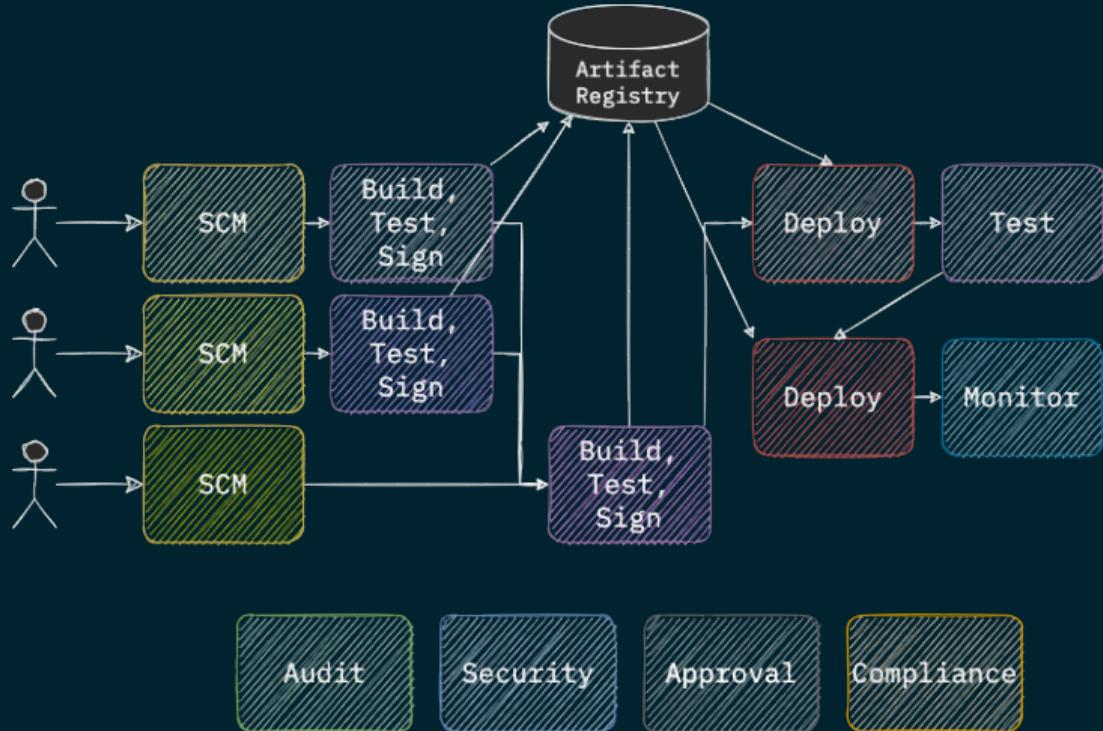

# Software Factory

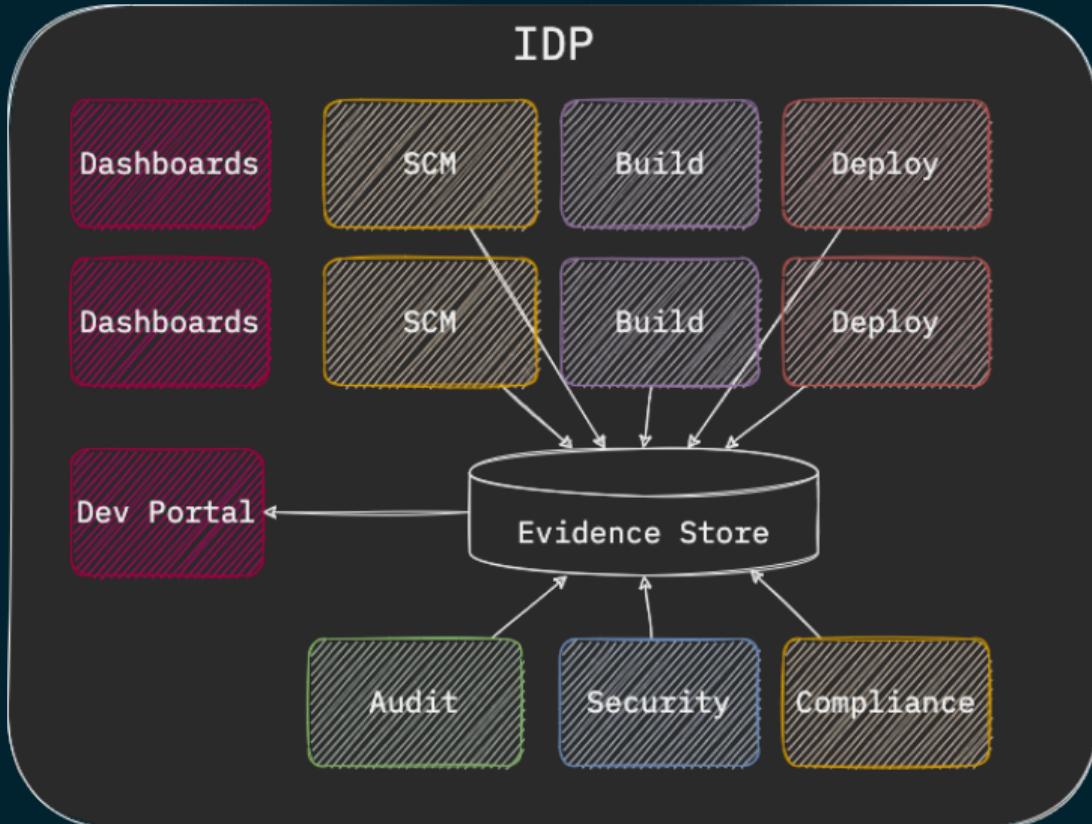

# Software Factory

- › "Glue code" explosion
- › Does not scale
- › Expensive to onboard new services
- › Hard to maintain

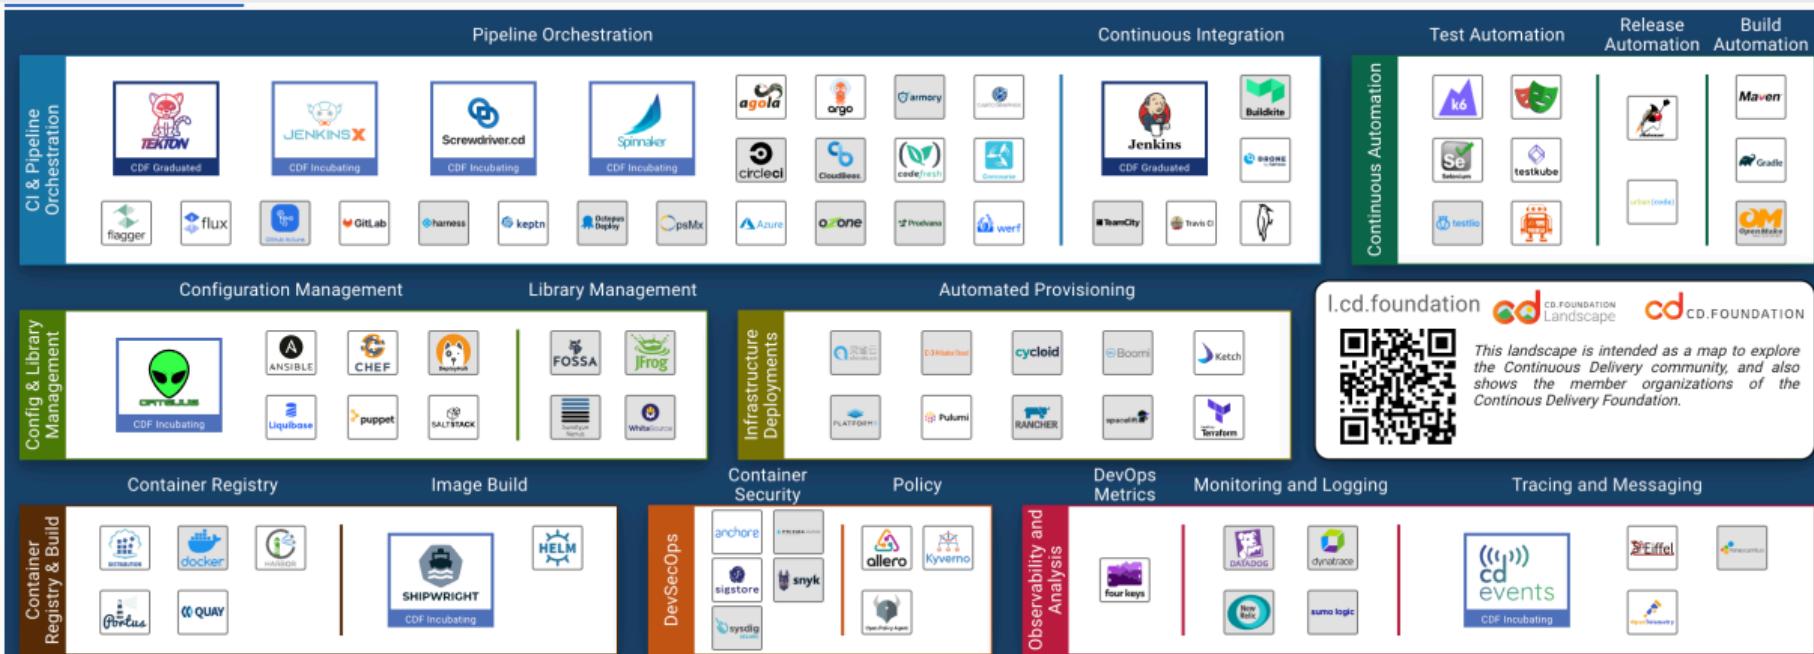

# Internal Development Platform

- › Lock-in effect
- › Missing/Broken Data
- › Many Dashboards

# A Plethora of Tools

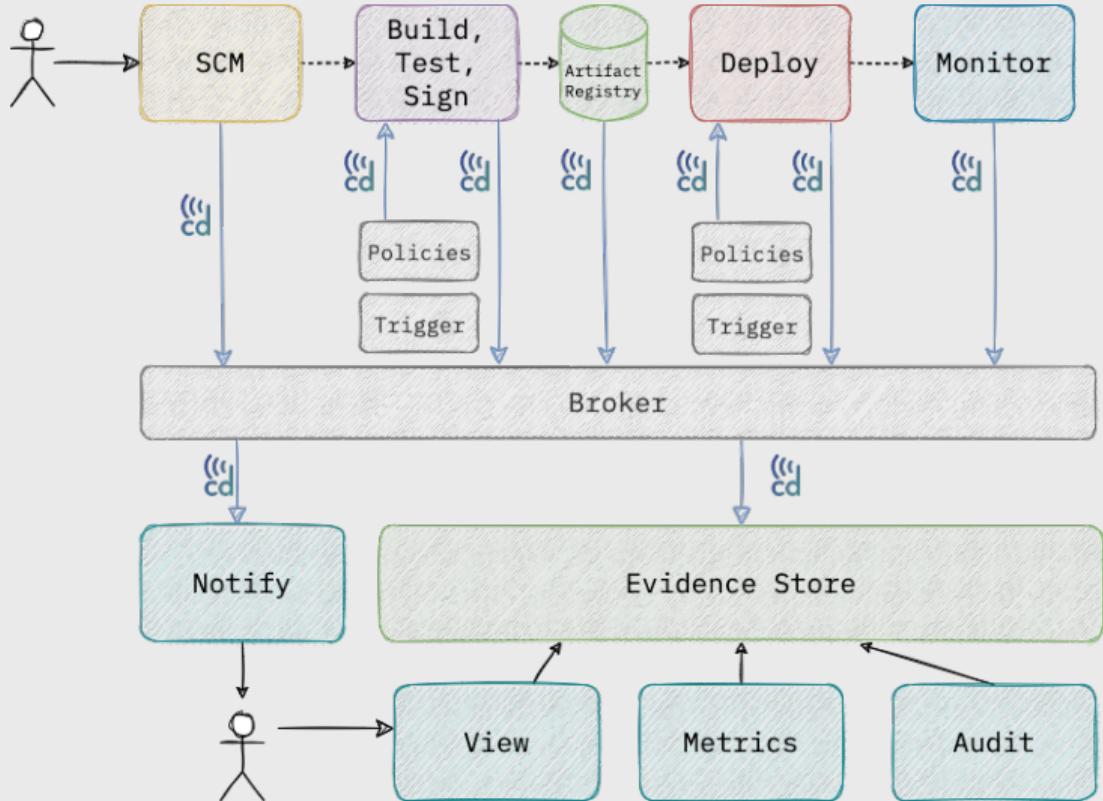

# A common specification for Continuous Delivery Events

# Interoperability

- › Less "Glue Code"
- › More focus on DevEx and DevOps metrics
- › Better quality data
- › Drive Best Practices

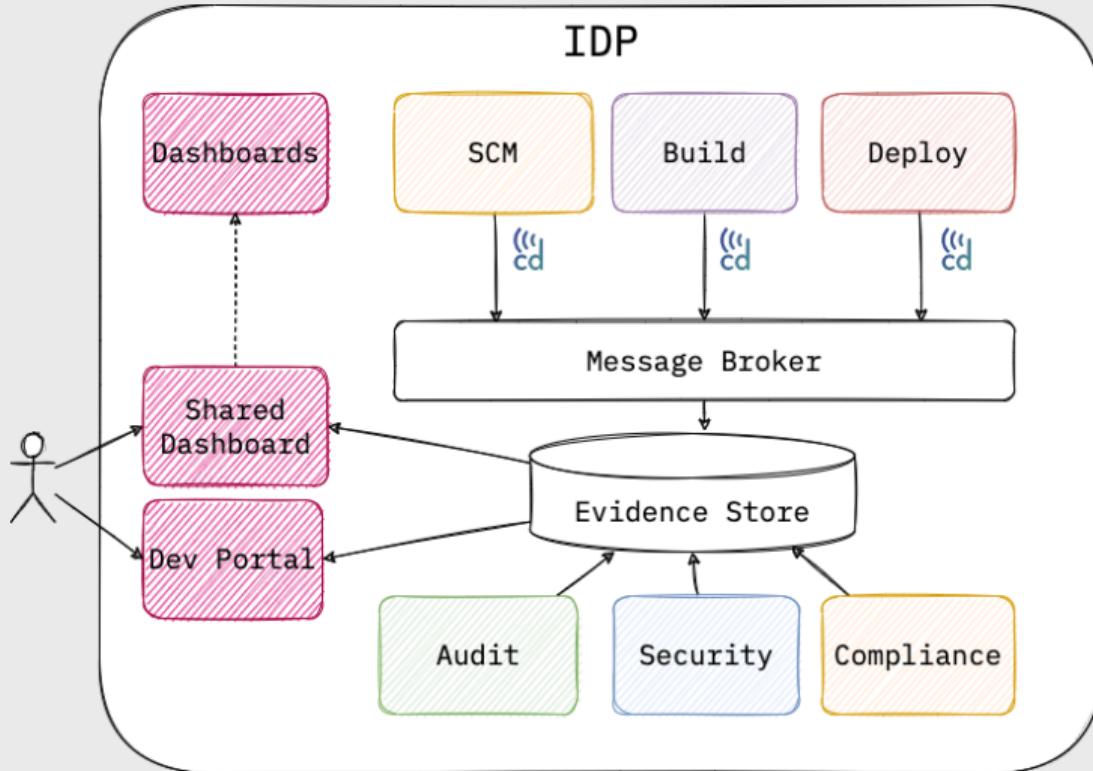

# Evidence Store Supply Chain Security

- › Where is this code deployed?  
Tracking vulnerabilities
- › How was this code built?  
Audit and compliance
- › How long did it take?  
DevOps Metrics
- › What's happening right now?  
One overview dashboard for all needs

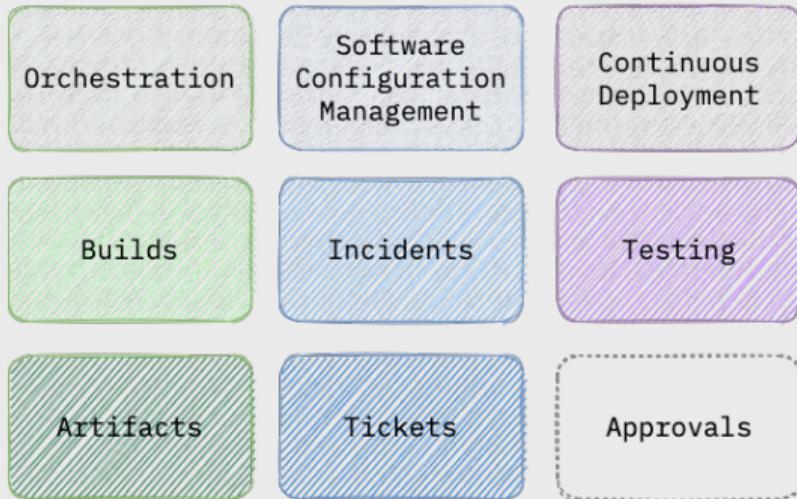

# IDP and CDEvents

- › Add/swap tools
- › Consistent Data
- › Single Dashboard
- › Promotes Collaboration through Open Source
- › CDEvents and [CNOE.io](#)

# Components

## Specification:

## Bindings:

## SDKs:

# Community

- DevOps Engineers  
Share your Interoperability pain-points
- Tool Maintainer  
Adopt CDEvents for your tool
- DevOps Vendor  
Make it easier for users to integrate  
your offering by supporting CDEvents
- Love DevOps & Interoperability  
Join us and contribute to CDEvents!

# What's New

# ((c)) cdevents 0.4

## Linked Events:

- › Connect Events
- › Fast Filtering
- › Visualization
- › Audit Trail

## Ticket Events:

- › Inception to Deployment
- › E2E Metrics
- › Ticket Based Automation
- › Interop.

## Custom Events:

- › Schema
- › Custom Types

## Artifact Events:

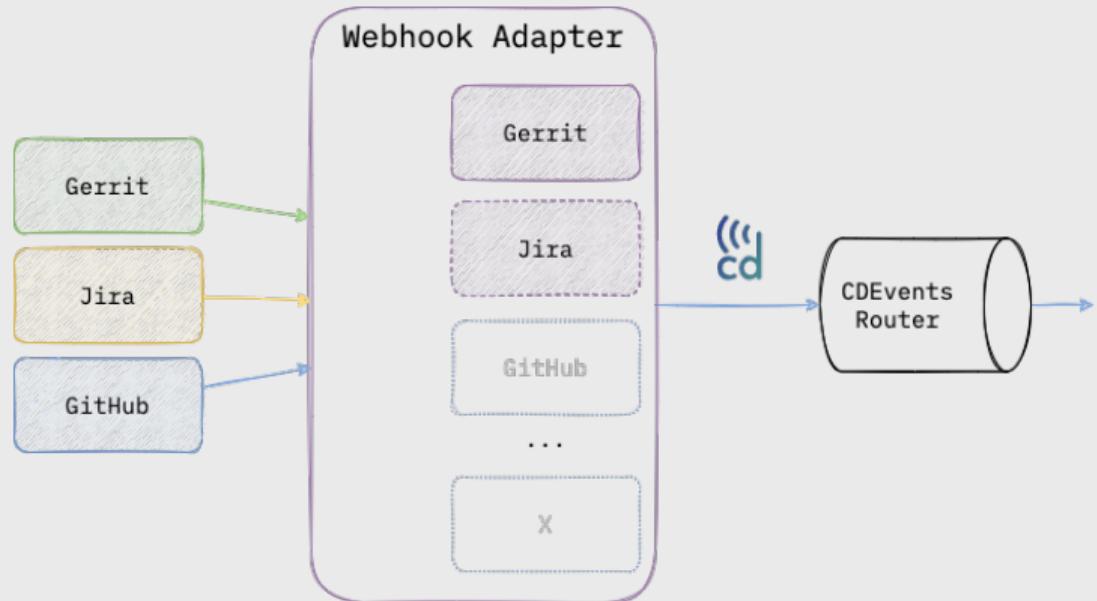

- › SBOM, User
- › New Predicates

## Release Announcement:

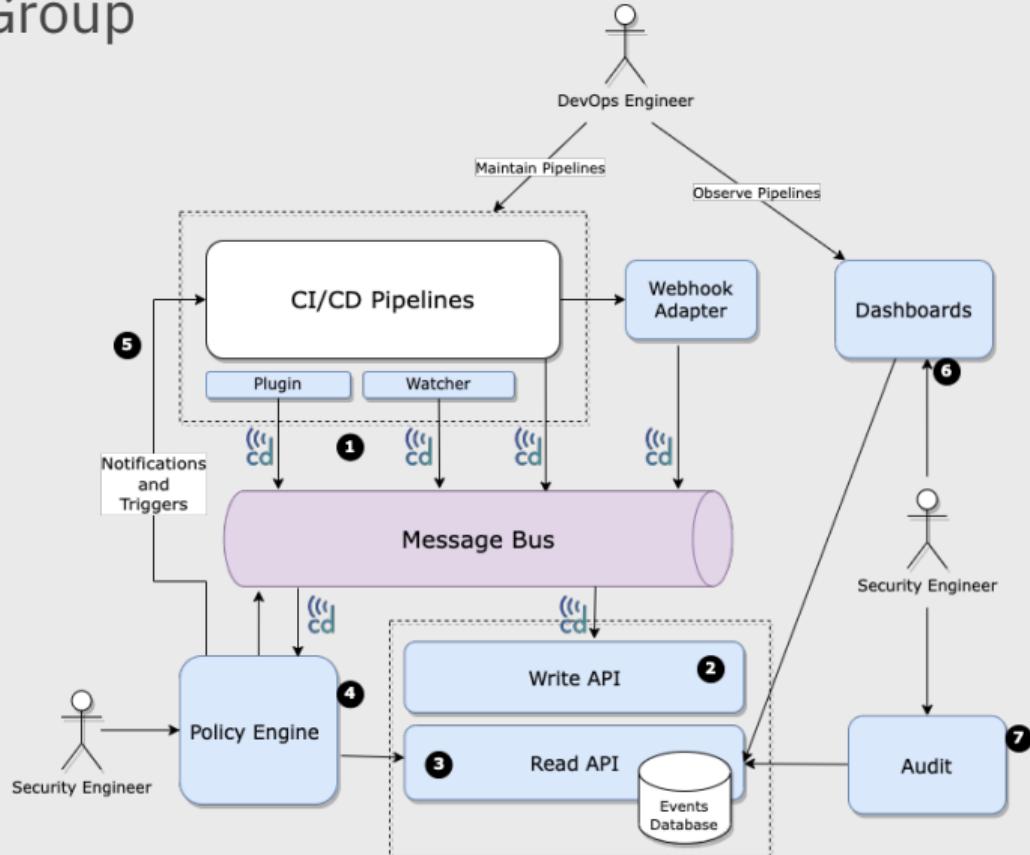

# Webhook Adapter

- › Plugin mechanism
- › Translate into CDEvents
- › Deliver CDEvents to a sink

# Implementation Working Group

- › 1. Send Events
- › 2. Ingest in a DB
- › 3. Read Events
- › 4. Apply Policies
- › 5. Notifications and Triggers
- › 6. Visualize Workflows
- › 7. Audit Software Factory

# Roadmap

# CDEvents Roadmap

## v0.5 and beyond

### New features

- Approvals
- Compositions
- Releases

### Software & Architecture

- SDKs (JS, .NET)
- Webhook Adapter
- Visualization
- Links Service

### Proof of Concept

- CDEvents + CNOE.io
- CDEvents Visualization

### Continue to Drive Adoption

# Conclusions

- › Lack of Standardization in the Continuous Delivery Space

**which means**

- › Complexity & Costly integrations
- › Risk of inconsistent and incomplete data
- › Developer fatigue

- › CDEvents is a common specification for Continuous Delivery Events

**which means**

- › Standardization
- › Flexibility & Better DevEx
- › Better supply chain security stance through data

# Thank You!
